

Automate key processes,
gather business intelligence
and make informed decisions.

Bell Management Centre
powered by Ericsson.

Bell Management Centre is a cloud-based platform that offers real-time access to the operational status and metrics of your M2M devices connected to the Bell network. This easy to use self-serve portal allows you to manage and monitor M2M devices and connections in real-time with leading-edge diagnostic tools. Bell Management Centre can help drive automation, improve processes and provide full insight and control of your IoT infrastructure.

Manage your M2M devices, SIM cards and subscriptions

- Order and manage SIM cards
- Activate, suspend and deactivate SIM cards
- Manage subscription packages

Monitor traffic and set trigger notifications

- View subscription traffic
- Analyze aggregated traffic
- Enable real-time trace
- Set trigger alarms

Analyze usage and subscription data

- Access real-time operational status and metrics
- Track usage data
- Review subscription details

How can Bell Management Centre help you?

With instant access to all of your devices, you'll have the tools you need to stay on top of your business at your fingertips:

- Reduce costs, improve efficiencies and productivity
- Capture and modify data in real time
- Resolve issues quickly with real-time diagnostics

Choose Bell for world class Internet of Things (IoT) solutions.

Bell offers the best selection of global IoT platforms in Canada.

Only Bell offers access to M2M platforms powered by both Jasper and Ericsson, so wherever your business takes you, Bell has you covered better than anyone else.
